

FEDERICO SCHIPANI

Machine Learning Engineer

@ federicoschipani@outlook.com +39 3272919560 Reggello (FI), Italy federicoschipani

BIO

Data Scientist and Machine Learning Engineer with experience building and deploying AI solutions across AWS, GCP, and Azure. Specialized in machine learning, computer vision, and generative AI, with a strong focus on scalable cloud architectures and MLOps. Experienced in translating complex data challenges into production-ready AI systems that deliver measurable business value.

EXPERIENCE

Senior Machine Learning Engineer

Data Reply

09/2022 – On going Remote

- Developed AI solutions including computer vision pipelines for image segmentation and a Generative AI chatbot on Azure using OpenAI models to generate training questions from a knowledge base.
- Led cloud-native AI and data science initiatives across AWS, GCP, and Azure, including the migration of an AI-based insurance pricing assistant from GCP to AWS and the migration of a monitoring platform from on-premises to Google Cloud.
- Developed machine learning models to estimate repair costs and processing timelines for insurance claims, performing feature engineering and KPI analysis to support data-driven decision making.
- Built and operationalized MLOps pipelines using Kubeflow on GCP and SageMaker Pipelines on AWS, enabling scalable training, experimentation, and automated model deployment.
- Designed event-driven data platforms using Confluent Cloud on Azure, integrating Kafka with cloud-native services via Terraform and implementing secure architectures with encryption and key lifecycle management.

Data Scientist

Polaris Engineering

05/2020 – 09/2022 Pistoia, Italy

- Designed and deployed ML/DL models for audio, image, and tabular data analysis; conducted research on AI for Industry 4.0 and artistic generative applications; delivered PoCs as web apps and chatbots using Google Cloud and Dialogflow.

EDUCATION

M.S. in Computer Science (Data Science)

Università degli studi di Firenze

2016 - 2020 Firenze, Italy

- Thesis: *Deep Learning Techniques for Object Detection in Thermal Videos*
- Grade: 110/110 with Honours

CERTIFICATION

Professional Machine Learning Engineer, Google Cloud Platform	06/2023 – 06/2025
Machine Learning Specialty, Amazon Web Services	10/2023 – 10/2026
Cloud Practitioner, Amazon Web Services	11/2024 – 11/2027
AI Practitioner, Amazon Web Services	11/2024 – 11/2027
DE Associate, Amazon Web Services	11/2025 – 12/2028

SKILLS

Programming Language

- Python
- Javascript / NodeJS

AI/ML

- PyTorch / FastAI
- OpenAI
- Tensorflow / Keras
- Scikit-Learn
- HuggingFace
- Matplotlib / Seaborn

Web

- React
- Next.js
- FastAPI

Database & Big Data

- SQL
- MongoDB

Cloud

- Azure
- Amazon Web Services

LANGUAGES

Italian English

INTERESTS

- Machine Learning
- Photography
- Blogging
- Automotive
